

ABSORB RAFTS

50mm Absorb hanging rafts are a high-quality class A acoustic absorber manufactured from fabric wrapped recycled PET fibers

Rafts are excellent at battling reverberation and echo and should be suspended directly above the noise source for optimal performance. The Absorb panel core is an open-cell 60% recycled PET panel which is lightweight and easy to suspend, finished in a wide range of industry-leading Camira fabrics, or used in its naked state for a cost-effective solution.

DATA

FIRE SPECIFICATION

ASTM E84-18a CLASS A

COMPOSITION

60% Recycled PET Fibre | 40% Virgin Fibre

DENSITY

4KG/M2

ACOUSTIC PERFORMANCE

CLASS A

RECOMMENDED SPACING

We recommend a minimum of 75mm spacing from the ceiling.

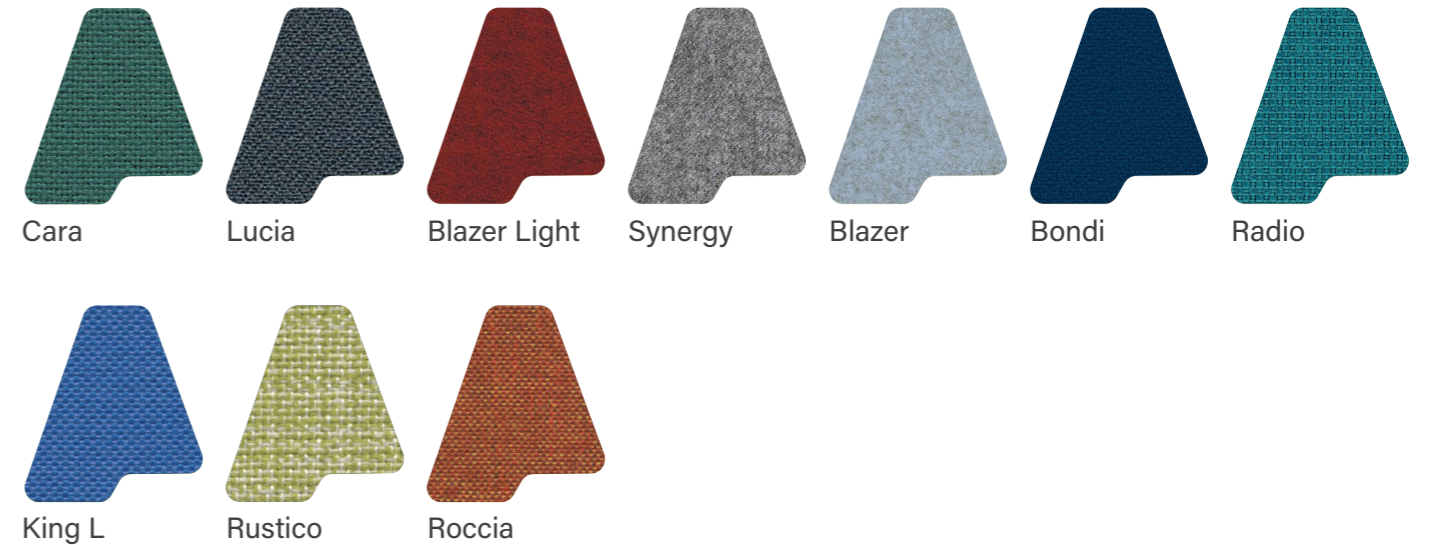

FEATURES

AREA OF APPLICATION: CEILINGS

- Manufactured using recycled materials
- Available in a range of shapes & sizes
- Available in over 200 colours
- Available Fabric wrapped & unwrapped
- Class A acoustic rating
- A great solution for low – high frequency issue
- Panels can be cut to size to suit your project
- Core material is a brilliant white
