

ECHO PANEL

Echo acoustic panels offer a practical and cost-effective treatment to reverberation and echo.

Remove unwanted reverberation and echo from your interior by installing Echo Panels to your walls and ceilings. Echo Panels are a high quality, handcrafted class A acoustic solution manufactured from a lightweight foam core and fabric finish. There are over 200 colours available to ensure the perfect match to your interior. All panels can be custom made for the perfect fit and are available with a self-adhesive peel and stick backing. Choose from a range of shapes, sizes and thicknesses for that perfect acoustic solution.

FEATURES

AREA OF APPLICATION: WALLS & CEILING

- Light weight for weight sensitive walls & ceilings
- Easy to handle and quick to install
- Supplied with a peel and stick self-adhesive
- Available in over 200 colours
- Available in any thickness from 10 – 200mm
- Class A acoustic rating direct fix
- A great solution for mid – high frequency issues
- High fire performance perfect for interiors
- Panels can be cut to site to suit your project
- Panels are hand wrapped for a high quality finish

FINISHES

Echo panels are finished in industry leading fabrics. The selection below is just a few of the example fabric ranges available. Please contact the sales team for the colour options available in each range.

SHAPES

Choose from a standard range of shapes or create your own. Create bespoke designs to suit your project.

INSTALLATION

The Echo Panel is supplied with a self-adhesive backing for a simplistic peel and stick installation. Panels can be supplied without self-adhesive on projects where self-adhesive is not an option. Ensure your wall/ceiling is clean from contaminants and finishes are fully cured. Please consult a professional installer for site specific installation.
